**(“Condor Gold”, “Condor” or the “Company”)**  
**Issue of Options**

Condor Gold (AIM: CNR; TSX: COG) announces that on 13 December 2021 (“Grant Date”) it granted 150,000 share options (the “Options”) under the Company’s existing Share Option Scheme to Jair Diaz Navarro (the “Grantee”), the recently appointed Senior Mining Engineer to the Company. The Options were granted by the remuneration committee and approved by the Board. The Options have an exercise price of 35 pence per share, being 16% above the 10-day volume weighted average closing price as of 30 November 2021. They may be exercised up to 5 years from the Grant Date, with the restriction that no options can be exercised within 12 months of the Grant Date, only up to 50% of the options can be exercised in the following 12 months and thereafter 100% of the said options can be exercisable, provided that the Grantee remains with the Company. Following the grant of the Options, 15,148,500 share options will be outstanding, representing approximately 10% of the 146,630,715 ordinary shares in the Company in issue.

### **About Condor Gold plc:**

Condor Gold plc was admitted to AIM in May 2006 and dual listed on the TSX in January 2018. The Company is a gold exploration and development company with a focus on Nicaragua.

On 25 October 2021 Condor announced the filing of a Preliminary Economic Assessment Technical Report (“PEA”) for its La India Project, Nicaragua on SEDAR <https://www.sedar.com>. The highlight of the technical study is a post-tax, post upfront capital expenditure NPV of US\$418 million, with an IRR of 54% and 12 month pay-back period, assuming a US\$1,700 per oz gold price, with average annual production of 150,000 oz gold per annum for the initial 9 years of gold production. The open pit mine schedules have been optimised from designed pits, bringing higher grade gold forward resulting in average annual production of 157,000 oz gold in the first 2 years from open pit material and underground mining funded out of cashflow.

In August 2018, the Company announced that the Ministry of the Environment in Nicaragua had granted the Environmental Permit (“EP”) for the development, construction and operation of a processing plant with capacity to process up to 2,800 tonnes per day at its wholly-owned La India gold Project (“La India Project”). The EP is considered the master permit for mining operations in Nicaragua. Condor has purchased a new SAG Mill, which has mainly arrived in Nicaragua. Site clearance and preparation is at an advanced stage.

Environmental Permits were granted in April and May 2020 for the Mestiza and America open pits respectively, both located close to La India. The Mestiza open pit hosts 92 Kt at a grade of 12.1 g/t gold (36,000 oz contained gold) in the Indicated Mineral Resource category and 341 Kt at a grade of 7.7 g/t gold (85,000 oz contained gold) in the Inferred Mineral Resource category. The America open pit hosts 114 Kt at a grade of 8.1 g/t gold (30,000 oz) in the Indicated Mineral Resource category and 677 Kt at a grade of 3.1 g/t gold (67,000 oz) in the Inferred Mineral Resource category. Following the permitting of the Mestiza and America open pits, together with the La India Open Pit Condor has 1.12 M oz gold open pit Mineral Resources permitted for extraction.
